RT L.T.A the home of the SkyGuard Aerostat Family

RT is an Israeli based company with full capabilities in the areas of development, production, integration, delivery and training of the SkyGuard Aerostat family. Our family of SkyGuard aerostats provide the life support for a large span of aerostats ranging from 20 meters up to 73 meters length.

RT known as a world-class leader and the supplier of the SkyStar™ family of tactical aerostats and a group of experts with a collective experience of over than 200 years of aerodynamics engineering, mechanical engineering know-how and mass delivery of large aerostats. RT develop and manufacture a family of aerostats called SkyGuard with flexible capabilities of payloads ranging from 50 kg to 2,500 kg and capable of flying at altitudes between 3,000 and 15,000 feet. Due to the fact that RT is payload agnostic we are able to integrate and fly versatile sensors such as: radars, a variety of intelligence payloads (COMINT, ELINT) and communication payloads supporting air-defence, borders protection, coastal surveillance missions and civilian applications, such as for a safe city.

Advantages to Customers

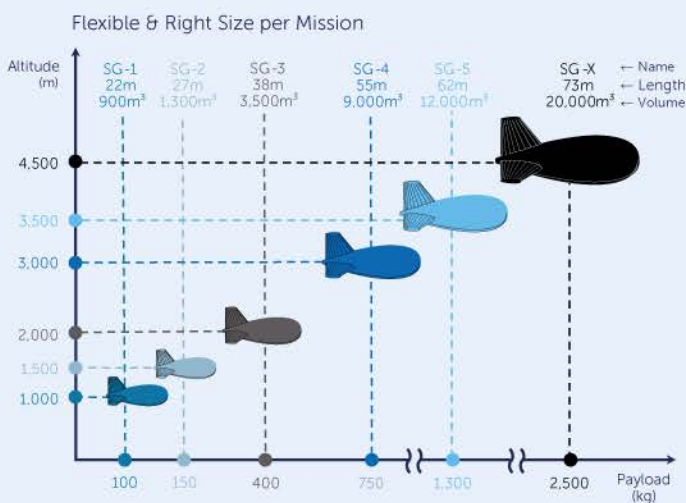

The main benefits of RT and SkyGuard Aerostat Systems are:

- High technology with most modern fabrics and low-Helium leakage.
- High performance with strong wind resistance and long endurance.
- High flexibility providing optimal sizes and "tailor fit" solutions.
- Best support with in-house integration capability and veterans specialized in customer-focused aerostats operations.

- long-life & low-leakage
- high mobility
- easy operations
